

Color Guide: Painting a Bungalow (1910-1940)

Wood trim and features on the Bungalow were painted or stained colors that harmonized with nature. Bungalows used contrasting colors to accent their architectural features. For example, if the wood window sashes were painted white, contrasting colors such as deep browns or oranges were used on the window trim. Greens are also good colors for wood trim. Favorite colors for lap siding, shingles, or stucco were pale yellows and greens.

*****Unpainted brick or stone should never be painted as it could drastically alter the home's original character and traps moisture inside walls.**
